COMPUTER SCIENCE AND ENGINEERING (CYBER SECURITY)

CERTIFICATE

This is to certify that the AICTE Activity Point Programs carried out by **M e g h a n a M J (1DS22CY026)** of VIII semester, for the partial fulfilment towards requirement for the award of degree in **Bachelor of Engineering in Computer Science and Engineering (Cyber Security),** Visvesvaraya Technological University, Belagavi, for the year **2025- 2026**

Signature of Proctor	Signature of Coordinator	Signature of HOD
Dr. Mohammed Tajuddin Professor and Head Department of CSE (Cyber Security) DSCE.	Dr.Deepthi V S Assistant Professor Department of CSE (Cyber Security) DSCE.	Dr. Mohammed Tajuddin Professor and Head Department of CSE (Cyber Security) DSCE.

ACKNOWLEDGEMENT

I wish to express my sincere gratitude to respected **Dr. B G Prasad**, Principal, Dayananda Sagar College of Engineering, Bengaluru for providing me an opportunity to complete the AICTE Activity Point Programs.

I am grateful for the constant encouragement and cooperation from my honorable Head of Department, **Dr. Mohammed Tajuddin**, Department of Computer Science and Engineering (Cyber Security) , Dayananda Sagar College of Engineering, Bengaluru.

My sincere thanks to my Proctor, **Dr. Mohammed Tajuddin,** HOD, Department of Computer Science and Engineering (Cyber Security) in guiding and encouraging me throughout the activity period.

I also thank our AICTE Activity Point coordinator **Dr. Deepthi V S,** Assistant Professor, Department of Computer Science and Engineering (Cyber Security) for her support and suggestions throughout the activity period.

ACTIVITY - 1

TITLE - DEVELOPING AND MANAGING EFFICIENT GARBAGE DISPOSAL SYSTEM

DATE - 9th July 2024 to 25th July 2024

Objectives:

- Enhance waste literacy among community members through educational initiatives and engagement activities.
- Improve access to efficient waste disposal methods and promote the adoption of sustainable waste management practices.
- Foster collaboration and innovation in waste reduction efforts within the community.
- Cultivate a culture of responsible waste disposal and eco-friendly behaviors among residents.
- Empower community members with the knowledge and tools necessary to actively participate in environmental activities.
- Strengthen community cohesion and resilience through collective action and shared commitment to waste management.
- Monitor and evaluate the impact of the initiative through surveys, endorsements, and visual representations.
- Promote continuous learning and engagement in waste reduction practices among community members.

Description of the Event:

The "Efficient Garbage Disposal System Management" initiative is a comprehensive approach aimed at revolutionizing waste management practices within local communities. By strategically integrating smart waste bins, waste-to-energy technologies, and community education on sustainable waste disposal practices, the initiative seeks to address challenges associated with traditional waste management methods and establish an efficient and environmentally friendly waste disposal system. Through collaborative efforts with residents, local authorities, and environmental organizations, the initiative aims to promote sustainable waste disposal practices and leverage technological innovations to create a cleaner and healthier living environment. With a vision of achieving transformative impact, the initiative emphasizes the importance of adopting sustainable waste management practices and fostering a culture of adaptability and forward-thinking in waste management.

Outcome of the Event:

The evaluation of the "Efficient Garbage Disposal System: Transforming Waste Management for Communities" initiative highlights significant improvements in waste management practices within the community. Through surveys, participation endorsements, and documented images, it's evident that community members have enhanced their waste literacy, gained access to efficient waste disposal methods, and embraced sustainable waste management practices. This initiative has fostered a more connected and informed community, promoting collaboration and innovative waste reduction practices. Feedback indicates a positive shift in attitudes towards responsible waste disposal, with increased confidence in adopting eco-friendly tools and practices. Furthermore, sustained impacts on community well-being are evident through increased collective responsibility, empowerment, and a culture of continuous learning. Statistical data and visual representations further support the initiative's success, showcasing improvements in waste literacy rates, environmental indicators, and community engagement metrics. Overall, the initiative's outcome analysis illustrates a transformative journey towards improved waste management and community cohesion, making it a catalyst for positive change.

ACTIVITY - 2

TITLE - FACILITATING 100 % DIGITALIZED TRANSACTION

DATE – 5th April 2024 to 18th April 2024

Objectives:

The objectives of digitalizing transactions through Unified Payments Interface (UPI) encompass several key goals aimed at enhancing convenience, efficiency, transparency, and financial inclusion within the payment's ecosystem. Here are the primary objectives:

Convenience: UPI aims to provide a seamless and user-friendly platform for making digital payments. By enabling transactions through mobile phones using a single identifier (like a Virtual Payment Address), UPI simplifies the payment process, reducing the need for cash transactions and traditional banking instruments.

Interoperability: UPI promotes interoperability among different banks and payment service providers, allowing users to initiate transactions across multiple banks using a unified platform. This interoperability enhances convenience for users and encourages wider adoption of digital payments.

Real-time Settlement: UPI facilitates instant fund transfers in real-time, offering immediate confirmation of transactions. This feature supports quick and efficient payment processing, enabling businesses and individuals to manage their finances more effectively.

Financial Inclusion: One of the primary objectives of UPI is to promote financial inclusion by providing easy access to digital payment services, especially for individuals in remote or underserved areas. UPI allows anyone with a mobile phone and a bank account to participate in the digital economy.

Security and Transparency: UPI transactions are secure and encrypted, minimizing the risk of fraud and unauthorized access. Additionally, UPI provides transparency by allowing users to track their transactions in real-time through mobile banking apps, enhancing trust in digital payment systems.

Promotion of Cashless Economy: UPI plays a significant role in reducing reliance on cash transactions and promoting a cashless economy. By offering a convenient and reliable alternative to cash payments, UPI contributes to the government's efforts to formalize the economy and reduce black money circulation.

Cost-effectiveness: UPI transactions are generally more cost-effective compared to traditional payment methods like credit/debit cards or wire transfers. The lower transaction costs associated with UPI encourage businesses and individuals to embrace digital payments for everyday transactions.

Encouraging Innovation: UPI's open and standardized architecture encourages innovation in the fintech sector. It enables third-party developers to create innovative payment solutions and value-added services that leverage the UPI infrastructure, driving continuous improvement and expansion of digital payment capabilities.

the objectives of UPI digitalizing transactions revolve around enhancing convenience, promoting financial inclusion, ensuring security and transparency, driving the adoption of digital payments, and fostering innovation in the payments landscape. These objectives collectively contribute to building a robust and inclusive digital payment ecosystem that benefits individuals, businesses, and the overall economy.

Description of the Event:

The digitalization of transactions through Unified Payments Interface (UPI) is significant for transforming India's payment landscape. UPI enables users to link multiple bank accounts to a single mobile app, facilitating instant fund transfers using Virtual Payment Addresses (VPAs). This digital platform promotes convenience, financial inclusion, and transparency by reducing cash dependency, enhancing security, and lowering transaction costs. UPI's real-time settlement and government support drive innovation, fostering a robust digital payments ecosystem and contributing to India's digital transformation agenda. `

Outcome of the Event:

The widespread adoption of Unified Payments Interface (UPI) has ushered in a transformative shift in India's payment landscape, yielding profound outcomes that resonate across various sectors of society. With UPI's seamless integration of multiple bank accounts into a single mobile app, individuals and businesses alike have experienced unprecedented levels of convenience and accessibility in conducting financial transactions. This enhanced accessibility has played a pivotal role in promoting financial inclusion, empowering previously underserved segments of the population with access to formal banking services. Moreover, UPI's emphasis on security and transparency has instilled confidence among users, mitigating concerns related to fraud and ensuring the integrity of digital transactions. By reducing reliance on cash and facilitating instant fund transfers through Virtual Payment Addresses (VPAs), UPI has not only streamlined payment processes but also contributed to the broader objectives of promoting a cashless economy and formalizing financial transactions. Furthermore, UPI's real-time settlement mechanism and robust government support have spurred innovation within the digital payments ecosystem, paving the way for the emergence of innovative fintech solutions and driving India's digital transformation agenda forward. As a result, the widespread adoption of UPI has catalyzed a paradigm shift in how individuals

and businesses engage in financial transactions, laying the foundation for a more inclusive, secure, and digitally empowered future for India.

ACTIVITY - 3

TITLE - CONTRIBUTION TO NATIONAL-LEVEL INITIATIVE: SWACHH BHARAT

DATE – 22nd November 2025 to 10th December 2025

Objectives:

Swachh Bharat aims to eradicate open defecation by constructing millions of toilets across the country, promoting hygiene, and ensuring access to sanitation facilities.

The initiative focuses on effective solid waste management, encouraging proper waste disposal practices, recycling, and minimizing environmental pollution.

Swachh Bharat aims to instill a sense of cleanliness and hygiene among individuals and communities, fostering a culture of cleanliness in both urban and rural areas.

Swachh Bharat activities aim to raise awareness about the significance of cleanliness, sanitation, and their impact on health and the environment through various communication channels and campaigns. Proper waste disposal practices, recycling, and minimizing environmental pollution.

Description of the Event:

Swatch Bharath Activity (Contribution to any national level initiatives of the Government of India (Swatch Bharath, Skill India Digital India GoGreen India, Etc....

Swachh Bharath Abhiyan was officially launched on 2 October 2014 at Rajghat, New Delhi, where Prime Minister Narendra Modi himself wielded broom and cleaned a road. The campaign is India's biggest-ever cleanliness drive and 3 million government employees and schools and colleges students of India participated in this event Swachh Bharat Abhiyan is a cleanliness campaign run by the government of India and initiated by the Honorable Prime Minister, Narendra Modi. Swachh Bharat Abhiyan is also called as the Clean India Mission or Clean India drive or Swachh Bharat Campaign. This campaign involves the construction of latrines, promoting sanitation programs in the rural areas, cleaning streets, roads and changing the infrastructure of the country to lead the country ahead. To keep villages clean, solid and liquid waste management will be ensured through gram panchayat

Outcome of the Event:

1. **Improved Sanitation Infrastructure:**

The initiative has led to a significant improvement in sanitation infrastructure, with the construction of millions of toilets in rural and urban areas. Access to proper sanitation facilities has increased, reducing open defecation and promoting better hygiene practices.

2. Behavioral Change and Increased Awareness:

Swachh Bharat Abhiyan has played a crucial role in creating awareness about the importance of cleanliness and hygiene. Various campaigns and initiatives under the program have successfully instilled a sense of responsibility among citizens to keep their surroundings clean.

ACTIVITY - 4

TITLE - SPREADING HEALTH AWARENESS UNDER OUTREACH PROGRAM

DATE - 7th September 2024 to 23rd September 2024

Objectives:

Description of the Event:

The Healthcare Awareness Drive is a self-driven grassroots initiative aimed at improving public health through community-led actions and education. The drive is entirely propelled by the local residents, volunteers, and organizations, working together to address prevalent health challenges without any external mandates.

The initiative focuses on providing protective gear such as masks and hand sanitizers to the community, ensuring that individuals have the necessary tools to safeguard their health. Health education workshops are organized to equip community members with knowledge on maintaining good health practices and preventing common illnesses. The drive also promotes community-led sanitation campaigns, encouraging eco-friendly practices and cleaner living environments.

A key aspect of the drive is raising awareness about the importance of blood donation, tapping into the community's inherent altruism to meet critical healthcare needs. The initiative highlights the power of collaboration and grassroots engagement, amplifying its impact through collective action and shared responsibility. This self-driven approach showcases the resilience and agency of the community in addressing its healthcare needs, fostering a sense of empowerment and solidarity among participants.

Outcome of the Event:

The outcome of the Healthcare Awareness Drive has been impactful in several key areas, benefiting both the health and well-being of the community. By distributing protective gear such as masks and hand sanitizers, the drive has directly contributed to improving personal hygiene and reducing the spread of diseases. The health education workshops have empowered residents with the knowledge to maintain better health practices, prevent common illnesses, and make informed decisions about their well-being. Additionally, the community-led sanitation campaigns have fostered a cleaner, more sustainable living environment, enhancing public health and hygiene across the area. The emphasis on blood donation has encouraged a culture of altruism, with many community members stepping forward to contribute to critical healthcare needs.

Overall, the initiative has created a stronger sense of community responsibility and empowerment, encouraging active participation in maintaining and improving local health standards. Through collaboration and collective action, the drive has made a lasting positive impact, inspiring ongoing commitment to health and well-being.

ACTIVITY - 5

TITLE - CREATING AWARENESS REGARDING WATER MANAGEMENT

DATE - 29th January 2025 to 12 February 2025

Objectives:

- Minimize the production of waste
- Reduce pollution effects
- Ensure sustainability
- Having proper waste disposal methods available supports recycling and saves precious materials
- Disposal of the unusable materials in safe manner.
- Reduce the volume of the solid waste stream through the
- implementation of waste reduction and recycling programs.
- Maintain a balanced SWM system which benefits the
- Provide efficient and economical refuse collection.
- recycling, and disposal services.
- Provide facilities for the sanitary, efficient and economical
- reception and transportation of solid waste generated in
- Fairfax County.
- Provide for the operation of sanitary waste disposal
- facilities, utilizing the most economically viable and
- environmentally acceptable methods available.
- Provide regulatory oversight of the county's ordinances

Description of the Event:

Water harvesting is more than just a conservation technique; it is a vital practice that supports water sustainability, enhances local water supplies, and promotes environmental resilience. However, the effective adoption of water harvesting faces numerous challenges, such as pollution, inadequate infrastructure, lack of awareness, and unsustainable water usage practices. In response to these issues, the *Water Harvesting Awareness* initiative seeks to educate and inspire communities to recognize the

essential role of water harvesting and the need for immediate action to protect and replenish our water resources.

The community outreach program for water harvesting is a collaborative effort focused on raising awareness of the environmental significance of water conservation. This initiative engages local residents, environmental groups, and stakeholders to foster a deeper understanding of the value of water harvesting and the growing risks of water scarcity. Through interactive workshops, site visits to water harvesting structures and filtration systems, and educational events, participants are empowered to become proactive stewards of sustainable water practices and community water security.

A central objective of the awareness program is to emphasize the interconnectedness of human actions and the health of our water systems. By discussing the impacts of pollution, poor land management, and excessive water usage, the program highlights how our everyday practices directly affect water availability and quality. Through practical sessions and demonstrations of water filtration systems, participants gain insights into the benefits of water harvesting and the sustainable methods they can adopt in their own lives. Moreover, the water harvesting awareness program underlines the importance of collaborative action and informed advocacy for water conservation. By promoting sustainable water use and emphasizing the role of water harvesting systems, this initiative aims to create a community-wide movement towards responsible water management, ensuring the availability of clean, reliable water for current and future generations.

Outcome of the Event:

The outcomes of water harvesting awareness efforts are diverse and multifaceted, encompassing social, ecological, and economic dimensions. These outcomes demonstrate the positive impact of organized activities to promote water conservation, highlighting the potential for community engagement, environmental stewardship, and sustainable development. Ecologically, the benefits of water harvesting initiatives are seen in the preservation and replenishment of local water supplies and the resilience of surrounding ecosystems.
